

# Gloucestershire Warwickshire Steam Railway, PLC

## Safety Policy

The Board of the Gloucestershire Warwickshire Steam Railway Plc has overall responsibility of health and safety at the Gloucestershire Warwickshire Steam Railway (GWSR).

The business will be conducted in a way that causes no harm to the health and safety of staff, volunteers, passengers and members of the public.

All potential hazards will be identified and, so far as is reasonably practical, action will be taken to eliminate or control the associated risks.

Health and safety will be given equal status to other work activities undertaken by the GWSR.

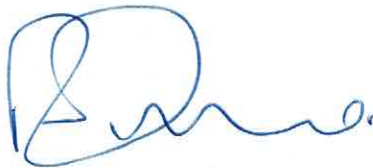

The active participation and commitment of all staff and volunteers is fundamental to the effective development of a positive health and safety culture.

All staff and volunteers will take reasonable care for the health and safety of themselves and other staff and volunteers, as well as to passengers and members of the public.

Continuous learning is essential and important. Any feedback from staff, volunteers, passengers and members of the public on health and safety is to be encouraged and will be welcome.

The GWSR Safety Management System defines the implementation of this policy.

Approved by the Board on 14 October 2019

Richard Johnson, Chairman of the Gloucestershire Warwickshire Steam Railway, PLC
